Re: July 2010 City of Port Orchard Inventory and Characterization Report

The Department of Ecology has reviewed the July 2010 City of Port Orchard Inventory and Characterization Report prepared by Port Orchard City Staff. This letter acknowledges that this report has accurately addressed all Ecology technical review comments on the March 2010 draft document. The July 2010 document is now considered a complete and accurate document that meets the WAC 173-26-201 requirements to use scientific and technical information as a base to develop Shoreline Master Program (SMP) provisions for the City of Port Orchard. The report accurately reflects the required scientific and technical information available for the City's shorelines.

If you have any questions, please feel free to contact me at 425-649-4309.

Sincerely,

Barbara Nightingale, Regional Shoreline Planner
